

CREATIVE GUIDE FOR CINEMA ADVERTISING

MESSAGE

A simple and concise message is the key to an effective cinema advertising campaign. Your message should be focused on a single product or selling point.

VISUAL

Simplicity builds recall. Clear, eye-catching visuals coupled with a streamlined message creates an effective campaign.

PHOTOS

Photography must be at least 2 megapixels having a resolution with a smallest dimension equal to or greater than 2,000 pixels. No time-stamped photography.

TEXT

Simplicity works. Up to 20 words are recommended for every 15 seconds, including your company name and location. Avoid complex details, as they could distract from your core message.

COLORS

To guarantee protection, text should be strongly contrasted against the background. Certain colors – such as 100% red and blue – should be outlined or surrounded by a light color to ensure protection. All text should fit within the designated safe area. Borders framing the entire outer edge of an ad or black-feathered edges are not recommended.

VOICE OVER

Screenvision recommends the following maximum word count when creating an advertisement for 15 and 30 second durations:

- 15 sec = 32 words
- 30 sec = 70 words

If supplying a script the instructions for the voice over should be clear and simple. Spell out numbers.

Example: 1-800-555-5555 should be typed as one eight hundred five five-five, five-five-five-five.

Provide the phonetic spelling of any words where pronunciation may be unclear.

ANIMATED ON-SCREEN CAMPAIGN

- QuickTime (.mov) use H.264 compression at best quality or Apple ProRes 422 (HQ).
- Ensure audio is high quality - free of audio glitches such as pops, static or other imperfections.
- Duration of audio and video must match and be in sync.
- Build ad to full HD dimension not the safe area.
- All text/logos must be contained within this designated safe area.
- Do not use any 3rd party plug-ins and / or filters.

*** Please note all digital ads must contain audio. If no audio is supplied Screenvision's Creative Department will Incorporate background music track into the final ad.**

*** Harkins theaters will not run ads with customized audio in the Early Preshow. Harkins will allow only non-audio ads in EPS.**

File: QuickTime Movie (.mov)

Dimensions: 1920 x 1080 pixels

Compression: H.264 compression at best quality or Apple ProRes 422(HQ)

Frame Rate: 24 fps

Aspect Ratio: Square Pixels

Color: 24-32 bit RGB

Duration: 15 or 30 seconds (other durations may be available contact your Screenvision Representative for details)

Safe Area: Follow Title Safe for HDTV 1080 video. All text/logos should be contained within the Title Safe area. (The safe area is 80% of total video or 1536 x 864 pixels)

Resolution: Full

Embedded Audio: Stereo (CH1 = LT, CH2 = RT)
